

CREATE YOUR OPTIMIZED SCHEDULE!

Manually create schedules or allow the algorithm to generate combinations based on your unique needs and preferences.

Schedule Builder uses courses pushed from a Preferred Plan in Graduation Planner or added manually to create multiple possible schedules.

- Access Schedule Builder in the [Minnesota State Student Planner](#) through your [Student eServices](#) account on any device connected to the internet.
- Block out times for work, sports, and other commitments.
- Lock in specific courses and times.
- View course information including seat availability.
- Spread classes out or cluster them in the fewest number of days possible.
- Set the minimum and maximum number of courses to take.
- Mark pairs of courses as mutually exclusive (Lit A **OR** Lit B) or as must be taken together (Lecture A **AND** Lab A).
- Indicate which delivery methods and instructors are preferred.
- A chosen schedule can be imported into your digital calendar, or printed to share with friends, family members, and employers.

Easily complete registration by adding the Course ID numbers from your schedule to Student eServices Courses & Registration in Search for a Course or by using Quick Add for multiple courses.

The diagram illustrates the process of transferring course information from the Schedule Builder to the Student eServices registration system. On the left, the 'Schedule Builder' interface shows a course entry for 'COMM200 - 01' with a course ID of '001088' highlighted in a red box. A red arrow points from this ID to the 'Quick Add' section of the 'Student eServices' interface on the right. In the 'Student eServices' interface, the 'Quick Add (Register)' button is also highlighted in a red box, and another red arrow points to the 'Course IDs' input field where the ID '001088' would be entered. The 'Register' button is also visible at the bottom of the 'Quick Add' section.
