Job Summary

This position will participate in full life-cycle management of all Minnesota State Windows Server Systems enterprise-wide (on-premises and Azure-based), as well as the client systems that are part of our managed computing services practice. The position provides support for VMware products (such as vSphere, vROps, VSAN and View), Windows-based operating systems, hardware and software appliances, Liquidware Profile Unity and Stratosphere UX, and other related systems and applications items to ensure continued and optimal delivery of services. Responsibilities include design, engineering, implementation, installation, configuration, backup and recovery, performance monitoring, operational security, maintenance, scripting, troubleshooting and documentation of physical and virtual systems in order to ensure optimal use and high availability of Minnesota State's infrastructure systems. Position requires advanced specialized technology knowledge in the above areas working on overall system problems. The incumbent works closely with the campus staff, enterprise service desk, wide area network, other system administrators, database staff, and project managers to coordinate support of all systems.

Qualifications

Minimum Qualifications:

- Five years of Windows® systems administration including experience working with utilities, scripting languages and systems security used in Windows® environments.
- Three years of experience working with VMware virtual server environment.

- Experience with server administration to include virtual and physical servers, disaster recovery and data backups.
- Advanced knowledge of networking fundamentals sufficient to direct decisions related to integration of services and security of an enterprise network.
- Solid PowerShell scripting abilities
- Ability to mitigate risk and understand the ramifications and impact that decisions have at a systems level; manage time and resources and effectively; and balance multiple, competing priorities.
- Experience with monitoring software and an ability to correlate metrics from disparate systems in order to troubleshoot issues or indicate performance deficiencies.
- Communication skills sufficient to: (1) mentor other IT staff (2) write clear and concise documentation (3) present complex technical concepts to audiences that may include ITS staff locally and on campuses as well as managers and system leadership.

Preferred Qualifications:

- Experience with vROps, VSAN, VMware View, Liquidware Profile Unity and Stratosphere UX is strongly preferred
- Proven track record of deploying highly available services, preferably for large organizations
- Possesses industry recognized certifications such as MCSE, MCSA, VCAP and/or VCP or commitment to obtain it
- Bachelor's degree in Computer Science or a related field or a related field or a combination of equivalent education and experience

Additional Requirements:

This position may require successful completion of the following:

- Written exam as part of interview process

In accordance with the Minnesota State Colleges & Universities (MnSCU) Vehicle Fleet Safety Program, employees driving on college/university business who use a rental or state vehicle shall be required to conform to MnSCU's vehicle use criteria and consent to a Motor Vehicle Records check.
