Expands capacity in the nursing program to admit 120 students per cohort, a 50 percent increase. Addresses significant deferred maintenance, improves pedagogy, and rightsizes classroom sizes to better serve a variety of class sizes and pedagogical approaches. Creates technologically advanced classrooms for programs that are growing. Improves wayfinding and access between building floors, increases space utilization with modernized and flexible classrooms. Solves significant ADA accessibility issues throughout the building.

SUMMARY
- Received $670,000 in 2018 for design and Phase I construction.
- Renovates: 36,076 GSF
- Directly benefits approximately 2,800 students in programs including business, accounting, paralegal, and computer science.

STUDENT IMPACT
- Creates flexible, technology-enhanced classrooms that foster collaborative learning environments for over 2,500 students studying English, music, theater, entertainment industries and technology, and media arts and design.
