Capital Improvement Program (CIP) Report

The Capital Improvement Program (CIP) Report provides an overview of the active major capital projects during the last six months and their status as of December 31, 2021.

For the purpose of this report, major capital projects include:
- Major capital projects funded by the State of Minnesota through general obligation (GO) bond funding,
- Higher Education Asset Preservation and Replacement (HEAPR) projects greater than $2 million in total appropriations,
- Projects funded through the sale of Minnesota State Revenue Fund bonds,
- College and university funded projects with contracts greater than $1 million, approved by the Board of Trustees,
- Guaranteed Energy-Savings Program (GESP) projects, and

General information on project delivery strategies and resources available to project managers is available in Attachment A.

2020 Bonding Update

In October, the legislature approved $90.9 million in funding as part of their 2020 bonding bill. The funding included $44.5 million for 5 major capital projects and $46.4 million for Higher Education Asset Preservation and Replacement (HEAPR) funds.

2022 Bonding Update

The Board of Trustees approved a capital bonding request of $292.9 million for the 2022 legislative session. The request includes $150.0 million for HEAPR and $142.9 million for 20 major capital projects. The 2022 legislative is scheduled to run from Monday, January 31 to May 23, 2022. The Minnesota State 2022 Capital Budget Request is included in Attachment B.

State Funded Major Capital Projects

There were 10 active major capital projects funded by the State of Minnesota during this six-month reporting period. These active projects represent a total of $120.4 million in GO bond funding by the state.
Individual project data sheets for the active projects are included in institution alphabetical order at Attachment C.

**State Funded Major HEAPR Projects (over $2M)**

There were 6 active, large (a total planned design and construction project cost greater than $2.0 million) HEAPR projects during this six-month reporting period.

HEAPR funds are provided through GO bonding and are allocated to campuses to perform repair and replacement of major building systems. As required by Minnesota Statute 135A.046, capital budget expenditures for HEAPR projects must be for one or more of the following: code compliance including health and safety, Americans with Disabilities Act requirements, hazardous material abatement, access improvement, air quality improvement, building energy efficiency improvements using current best practices, building or infrastructure repairs necessary to preserve the interior and exterior of existing buildings, or renewal to support the existing programmatic mission of the campuses.

**Revenue Fund Bond Sale Funded Major Capital Projects**

There were no major capital projects funded through the sale of Revenue Fund bonds active during this reporting period.

**College and University Funded Major Capital Projects (over $1M)**

There were 5 active college and university funded projects with contracts more than $1 million approved by the Board of Trustees during this reporting period. These contracts total over $16 million and are funded by college or university general funds, and/or revenue or auxiliary fund proceeds. Revenues come from tuition and fees, state general fund appropriation, donations and gifts.

**Guaranteed Energy-Savings Program**

There was 1 active Guaranteed Energy-Savings Program (GESP) projects during this reporting period. GESP is an alternative means for financing and delivering energy efficiency, renewable energy, and facilities renewal projects. GESP Master Contracts were established by the Minnesota Department of Commerce in response to Governor’s Executive Order 11-12. Financing is via a lease-purchase agreement based on a performance contract which uses guaranteed energy savings from the improvement as a means to pay the lease over a period of time. If actual savings are not realized, the GESP vendor pays the difference between actual savings and agreed upon savings.
There was 1 active major capital project funded in part by EDA grants. The EDA grants directly impact the communities and regions to help them build the capacity for economic development. EDA grants can be used as a resource to supplement the funding of major capital projects at colleges and Universities.

**Active Major Capital Projects Summary**

**Major Capital Project Summary:** The following major capital projects (sorted by Funding Year) were active during this CIP reporting period.

General Information

Project Delivery Methods

Minnesota State primarily utilizes two project delivery methods for major capital projects.

**Design/Bid/Build (D-B-B):** D-B-B is the traditional delivery method used for the majority of Minnesota State projects. Using this method, the lowest responsible bidder is awarded the project to act as General Contractor and they determine all subcontractors for the project.

**Construction Manager at Risk (CM@R):** CM@R is an alternate delivery method to reduce risk for Minnesota State on large complex projects. The Construction Manager is selected during the early design phase and establishes a Guaranteed Maximum Price for construction prior to bidding. Subcontractors are prequalified prior to bidding on the project.

Project Delivery Resources

A series of tools and resources is available for college and university project managers to effectively and efficiently deliver projects and meet standards and expectations set out in state statute and board policy and procedure. These resources include the Minnesota State Design Standards, eManual documents, Facilities Professional/Technical Master Contract program, and the Enterprise Project Management System that offer guidance on a variety of project delivery methods.

**eManual:** The eManual is a ready resource for college and university project managers as well as vendors and contractors doing business with Minnesota State college and universities. It includes contract templates, forms, instructions, white papers, and other documents reflecting requirements of state statutes and laws, and board policies and system procedures. The eManual is available at [https://www.minnstate.edu/system/finance/facilities/design-construction/index.html](https://www.minnstate.edu/system/finance/facilities/design-construction/index.html).

**Facilities Professional Technical Master Contract:** Master contracts streamline the selection and hiring of professional/technical consultants for small projects with fees under $100,000. The Facilities Professional/Technical Master Contract program provides college and university project managers with a database of consultants that have met minimum qualifications for 33 specialty services. More information about the program is available in the eManual.

**Enterprise Project Management System (EPMS/e-Builder):** e-Builder is the system’s project management platform and system of record. This program includes workflows aligned with requirements set out in state statute, board policy, and procedure as well as best practices.

Impact for students as a result of this project:

- Increasing the nursing cohort to 120 students over time,
- Creating modernized classrooms, code compliant restrooms, centralized offices, and flexible multi-purpose labs,
- Enhancing internal circulation and wayfinding, and
- Removing $4,902,000 in deferred maintenance.

Project Description

The scope of this project includes:

- Creating contemporary and flexible learning environments,
- Renovating approximately 35,000 square feet or more of existing space for laboratory, classroom and office space, and
- Transforming existing 1960’s interior space into a modern, sustainable, and collaborative environment.
**Project Funding**

- $569,000 2018 G.O. Bonds (Design)
- $16,282,000 2022 Planned G.O. Bonds
- $16,851,000 Total

**Project Costs**

- $1,077,000 Design
- $261,000 Project Management
- $12,036,000 Est. Construction Cost
- $80,000 Art
- $3,397,000 Occupancy
- $16,851,000 Total

Impact for students as a result of this project:

- Create more flexible teaching spaces and active learning classrooms,
- Create student study, gathering and collaboration spaces,
- Create and upgrade faculty offices and flexible multi-purpose labs,
- Removing $8,800,000 in deferred maintenance.

Project Description

The scope of this project includes:

- Demolition of existing Hagg Sauer Hall – approximately 82,500 SF
- Construct Academic Learning Center – approximately 27,750 SF
- Renovate significant spaces in Bensen Hall, Sattgast Hall, Bridgeman Hall, Bangsberg Hall and A.C. Clark Library – approximately 54,883 SF

Impact for students as a result of this project:
- Expands baccalaureate options through partnership with Metropolitan State University, further enhancing opportunities for underrepresented students in the Twin Cities.
- Enhances baccalaureate opportunities for students through flexible, technology-enriched learning and collaboration spaces.
- Creates new student support spaces, renovates faculty and staff office space, and student collaboration spaces.
- Benefits students in the business, management, and economics programs.

Project Description
Currently, the Management Education Center (MEC) is comprised of two buildings known as Old Harmon and New Harmon, which house business programs for both Metropolitan and MCTC. This project remolds the MEC and updates mechanical and electrical infrastructure.
The scope of this project includes:
- Providing new classroom and lab space for students.
- Providing new student support and collaboration spaces.
- Providing faculty and staff renovated office space.
- Replacing the roof of New Harmon and replacing/upgrading existing HVAC systems.
- Replacing exterior storm windows in Old Harmon.
- Renovating building entrances and restrooms.
- Addressing significant ADA deficiencies.
- Update finishes.
- Improve wayfinding.

Design Development Phase
Impact for students as a result of this project includes:

- Adding stair/elevator and stage access additions to serve student accessibility needs and,
- Creating state-of-the-art teaching environments,
- Providing flexible learning studios, and
- Improving technology throughout the building.

Project Description
The scope of this project includes:

- Renovation of historic Weld Hall and increasing space utilization,
- Reducing office space and adjusting mix of classrooms and labs, and
- Removing more than $8 million of deferred maintenance, including tuck-pointing, window replacement, providing sprinkler coverage and updating plumbing and HVAC.

Impact for students as a result of this project:

Impact for students as a result of this project:

Phase 1
- Improving wayfinding and access between floors, and
- Additional individual and collaborative student study and social areas.

Phase 2
- Overall increased space utilization,
- Updated technology in classrooms and student support areas, and
- Improved faculty offices.

Project Description

This project is separated into 2 phases due to funding. Phase 1 includes the primary interior renovation on the west side of the College Services Building. Phase 2 renovates the interior of the east side. Initial funding covers both phases while construction funding is planned in two appropriations. The scope of this project includes:

Phase 1
- Innovative student services delivery area
- 5 renovated classrooms and new testing lab
- New faculty and administrative offices and café

Phase 2
- Modernization of 27 classrooms
- New math and tutoring centers
- New computer lab and flexible furnishings

Impact for students as a result of this project:
- Strengthening the service to rural and communities,
- Eliminating 3,000 square feet in in temporary structure (trailer),
- Increasing program capacity for in demand, high-paying jobs
- Creating flexible, collaborative learning spaces with greater utilization
- Improving site circulation and safety

Project Description

The project will create space to support the Elementary Teacher Education program as it expands into a four year program. The scope of this project includes:
- Innovative research and development, machine, collaboration, and automation labs,
- Functional health science simulation lab and nursing lab
- Gunsmithing lab, welding labs, armory storage, and test shooting tunnel,
- Faculty office and support spaces, including a student study area

Impact for students as a result of this project:

• Modernizing of dated classrooms and the incorporation of active learning environments, and
• Addition of exterior gathering and activity areas

Project Description

The scope of this project includes the demolishing of the existing Memorial and Plaza Halls, Grounds Storage Garage, and related site work. The new work includes:

• An addition added to Endicott Hall for Classrooms, Faculty Offices and Student Support spaces,
• Renovations to existing classrooms, accessibility upgrades,
• Campus infrastructure improvements including a new central chiller plant, and
• Creation of an exterior plaza to the South for outdoor learning and student use.
• Creating contemporary and flexible learning environments,
• Renovating approximately 35,000 square feet of existing 1960’s interior space for laboratory, classroom and office space, and collaborative environments.
